Safety & Energy Efficient Features

- **Photovoltaic solar panels to convert sunlight into electricity. This innovative solar PV system in partnership with EcoSmart generates a substantial amount of the electricity needed to power the homes and helps to create a zero energy capable home.**
- High efficiency air conditioning system
- **Ground-breaking geothermal loop field or GeoGrid is installed at the start of development. This remarkable technology uses the thermal properties of the earth beneath our feet to heat and cool each home much more efficiently than traditional systems.**
- Open cell foam insulation applied to the underside of the roof decking which provides a climate controlled attic space and R-15 blow-in-blanket insulation in all exterior walls
- Weather-conscious measures around the foundation, windows and exterior doors to reduce air infiltration
- Vinyl Low-E double pane insulated windows lets light in but keeps heat out
- Energy-Saving LED bulbs throughout home (locations per plan)
